

## **JEC's Impressive Stand Attracts Visitors at Building Technologies Exhibition 2008**

**4 June 2008** – JEC is pleased that the importance of sustainable energy is being highlighted in 2008's Building Technologies Exhibition, a message that it has been working strongly to endorse both with its product range and prudent company values. JEC is proud to be promoting its latest range of money-saving and environmentally friendly innovations, with a broad scope of the most advanced energy-saving technologies, clean-air solutions and sustainable-water systems.

JEC's valuable business partners are also participating in the event and giving presentations in the Experts' Corner: Cummins Power Generation will give a technical seminar on "Distributed Generation – the Green Energy for your need" from 15:00-16:00, 5 June 2008 in Hall 1 Room B; PermaFrost will give a presentation on "Refrigeration Side Energy Solution for Air Conditioning" at the Building Services Technical Seminar from 16:00-16:45, 5 June 2008, in Hall 1 Room D.

"We are very pleased to have participated in this exhibition allowing us to showcase our key capabilities to our existing and potential customers. The expansion of the exhibition, both in size and scope together with more regional participation, allow companies like JEC, who are able to offer such a diversity of solutions, to demonstrate their broad product range," says Mr T Y Ngiam, Chief Development Officer of JEC.
